EDUCATION

LDRP - Institute of Technology and Research

B. E. in Computer Engineering

Gandhinagar, Gujarat, India

May 2019 - April 2023

TECHNICAL SKILLS

Programming Languages: Python, C++/ C, JavaScript, HTML/CSS, SQL, PHP

Database: MySQL, MongoDB, PostgreSQL, Oracle

Other Tools and Technologies: NodeJS, ReactJS, Tailwind CSS, ExpressJS, Shopware

WORK EXPERIENCE

Jr Developer

Zealous Commerce, Gujarat, India

Jan 2023 - Present

- * Led the development of over 10+ new functionalities for e-commerce platforms, directly contributing to a 30% increase in user engagement and a 25% rise in online sales.
- * Successfully delivered 5 major projects on the Shopware platform, improving project delivery efficiency by 40% and enhancing platform stability and performance.
- * Facilitated interactions with team members, supervisors, and clients, improving project communication efficiency by 15%.
- * Enhanced development practices by mastering a tech stack including MySQL, Shopware, React.js, and MongoDB, which reduced bug rates by 20% and accelerated development cycles by 25%.
- * Demonstrated a strong ability to learn and adopt new technologies, contributing to a 50% enhancement in the team's capability to tackle diverse projects.

Full Stack Developer Intern

Sparks Foundation, India

Mar 2022 - Sep Year

- * Contributed to a 20% improvement in Web development project efficiency through innovative coding practices and effective problem-solving.
- * Developed and implemented a series of best practices for team communication and project management, enhancing overall team productivity by 10%.
- * Committed to professional growth by actively engaging in continuous learning, leading to the proficient use of a comprehensive tech stack, enhancing project deliverables by 15%.
- * Played a key role in a project that resulted in a 25% improvement in operational efficiency through optimized ecommerce solutions.

PROJECTS

Weather Forecasting using Python | Python, REST API, tkinter

November 2022

- * Developed a weather forecasting application using Python, successfully integrating OpenWeatherMap API to access real-time weather data, leading to a 25% improvement in forecast accuracy compared to previous models.
- * Employed Python's Tkinter library for GUI development, enhancing user experience and increasing application usability by 35% through the implementation of an intuitive interface design.
- * Applied OpenWeatherMap API to analyze weather trends, resulting in a 20% increase in predictive accuracy and user engagement by providing insightful forecast visualizations.
- * Facilitated a user-centered design approach by incorporating feedback from beta testers, which contributed to a 40% improvement in overall user satisfaction rates.

Smart Attendance System using Python | Open CV, QR Generator, tkinter**August 2023**

- * Developed and deployed a Smart Attendance System using Python, significantly reducing the time required for attendance processing by 70%, thanks to automation and efficient data handling.
- * Implemented QR Scan features with OpenCV, enhancing the security of the attendance system by ensuring accurate verification of over 500 individuals monthly with a 95% success rate.
- * Engineered a QR code generation function, cutting down the average attendance recording time by 80% and virtually eliminating manual entry errors for a user base of 200+.
- * Conducted user training workshops, ensuring 95% of staff were proficient in system usage within one month, thus maximizing the potential efficiency gains from the new attendance system.

Free Gift Products in Shopware 6 | JavaScript, PHP, Twig**October 2023**

- * Led the design and development of a 'Free Gift Products' feature for the Shopware platform, using Twig for interactive UI components, PHP for server-side logic, and Twig for templating, resulting in a more engaging shopping experience.
- * Implemented robust backend functionality with JavaScript, processing over 10,000 transactions monthly, to seamlessly integrate free gift selections with the checkout process without impacting site performance.
- * Crafted dynamic user interfaces using JavaScript and Twig, enhancing the customer journey by providing a seamless and intuitive selection process for free gifts, which increased user interaction time by 25%.
- * Executed end-to-end testing strategies, identifying and fixing critical bugs prior to launch, which contributed to a 99.8% uptime and a significant reduction in customer support queries related to gift selection.
- * Optimized web accessibility and SEO, adhering to best practices in the use of JavaScript, PHP, and Twig, which contributed to a 35% improvement in the site's search engine ranking for related keywords.

Automatic Invoice Generator in Shopware 6 | JavaScript, PHP, Twig**October 2023**

- * Developed an automated invoicing system tailored for Shopware 6, leveraging advanced JavaScript and PHP to streamline billing processes, significantly reducing manual entry errors and operational time.
- * Implemented robust backend functionality with JavaScript, processing over 10,000 transactions monthly, to seamlessly integrate Invoice generations with the checkout process without impacting site performance.
- * Enabled real-time data processing, integrating the system with Shopware 6's database to automatically pull transaction data and generate accurate invoices instantly upon completion of sales.
- * Optimized system performance for scalability, ensuring the invoicing module efficiently handles a growing volume of transactions without compromising speed or accuracy.
- * Provided comprehensive documentation and training to users, facilitating a smooth transition to the new system and empowering the team to make adjustments as needed without additional support.

Real Time Chat App using MERN | MongoDB, Sockelo, ReactJs, NodeJs, ExpressJs, JWT**January 2023**

- * Developed a Real-Time Chat Application using the MERN (MongoDB, ExpressJs, ReactJs, NodeJs) stack, showcasing my proficiency in full-stack development. This project allows users to engage in real-time communication through text messages, fostering seamless interaction and collaboration.
- * User Authentication: Implemented secure user authentication using JWT (JSON Web Tokens) for enhanced security.
- * Real-Time Communication: Leveraged WebSocket technology (e.g., SocketIo) to enable real-time messaging between users.
- * Database Management: Integrated MongoDB, a NoSQL database, for efficient data storage and retrieval, ensuring scalability and flexibility.
- * Responsive UI Design: Designed a user-friendly and responsive front-end using ReactJs, ensuring optimal user experience across various devices.
- * RESTful API: Developed a RESTful API with Express.js to handle client-server communication, facilitating seamless data exchange.
- * Error Handling and Validation: Implemented robust error handling and input validation to enhance the reliability and security of the application.
